TRENDS IN PHARMACOLOGICAL SCIENCES **REFERENCE EDITION**

Volume 10 **1989**

CONTENTS

JANUARY

Can the vascular and neurogenic theories of migraine finally be reconciled? *Vivette Glover and Merton Sandler* 1
The silent epidemic: the search for treatment of age-related memory impairment, *R. D. Porsolt* 3

Current Awareness
Steroid modulation reveals further complexity of $GABA_A$ receptors, *Ewen F. Kirkness* 6
Receptor-mediated Ca^{2+} entry: diversity of function and mechanism, *Trevor J. Hallam and Timothy J. Rink* 8
Intercellular communication within the liver has clinical implications, *J. Adolfo García-Sáinz* 10
Progesterone derivatives that bind to the digitalis receptor, *F. S. LaBella, J. F. Templeton, V. P. Sashi Kumar and D. Bose* 11

Letters
G proteins and α-adrenoceptor classification, *H. Majewski and I. F. Musgrave* 14
Dopaminergic drug–receptor interactions, *J. E. Scott* 14
Mussel poisoning and excitatory amino acid receptors, *Gary B. Glavin, Carl Pinsky and Ranjan Bose* 15
Null method or operational model? *Dennis Mackay* 16
Finding affinity constants for agonists by the irreversible antagonist method, *D. H. Jenkinson* 16
Validity of the operational model, *D. Colquhoun* 17
Anonymity in refereeing, *Stan R. Blecher* 17

Principles
Challenges for receptor theory as a tool for drug and drug receptor classification, *Terry P. Kenakin* 18

Viewpoint
Is there a case for PAF antagonists in the treatment of ischemic states? *Pierre Braquet, Monique Paubert-Braquet, Matyas Koltai, René Bourgain, Federico Bussolino and David Hosford* 23

Reviews
The antiarrhythmic properties of β-adrenoceptor antagonists, *Ad P. IJzerman and Willem Soudijn* 31
Is antibacterial therapy against *Campylobacter pyiori* useful in the treatment of indigestion and chronic peptic ulceration? *N. J. Talley and J. E. Ormand* 36
New aspects of prolactin and immunity: a lymphocyte-derived prolactin-like product and nuclear protein kinase C activation, *Diane Haddock Russell* 40

Books
Receptor Biochemistry and Methodology Vol. 11: Adenosine Receptors, *edited by Dermot M. F. Cooper and Constantine Londos* 44
Platelet-Activating Factor and Related Lipid Mediators, *edited by Fred Snyder* 45

FEBRUARY

Functional studies on endothelin catch up with molecular biology, *C. Robin Hiley* 47
Receptor structure: the accelerating impact of molecular biology, *Nigel J. M. Birdsall* 50

Current Awareness
Subtypes of the κ-opioid receptor: fact or fiction? *John Traynor* 52
New selective COMT inhibitors: useful adjuncts for Parkinson's disease? *P. T. Männistö and S. Kaakkola* 54
Drugs interacting with 5-HT systems show promise for treatment of eating disorders, *Steven J. Cooper* 56

Computers
Spreadsheets, data handling and statistics, *Kanji Nakatsu and James A. Owen* 57

This and That: on color and catecholamines, *B. Max* 60

Letters
Will the true receptor affinity please step forward, *John A. Bevan and S. Martin Shreeve* 63

Reviews
Molecular biology of 5-HT receptors, *Paul R. Hartig* 64
Predicting the biologically active conformations of short polypeptides, *E. James Milner-White* 70
Mechanisms of signal transduction at the dopamine D_2 receptor, *Lucia Vallar and Jacopo Meldolesi* 74
Genetic approaches to the analysis of addiction processes, *Frank R. George and Steven R. Goldberg* 78

Books
Mathematics for the Biosciences, *by Ann C. Menell and Michael J. Bazin* 84
Drugs Handbook 1988–89, *by Paul Turner and Glyn Volans* 84
Stereoselectivity of Pesticides: Biological and Chemical Problems (Chemicals in Agriculture, Vol. 1), *edited by E. J. Ariëns, J. J. S. van Rensen and W. Welling* 85
Psychopharmacology of the Aging Nervous System (Handbook of Psychopharmacology, Vol. 20), *edited by Leslie L. Iversen, Susan D. Iversen and Solomon H. Snyder* 86

MARCH

Angiotensin receptors are implicated in the mechanism of *mas* action, *Kenneth Brown* 87

Current Awareness
5-HT receptors in the coronary circulation, *James A. Angus* 89
Neuropeptides and inflammatory mediators: bidirectional regulatory mechanisms, *Vincenzo di Marzo, John R. Tippins and Howard R. Morris* 91
Urodilatin: a newly described member of the ANP family, *S. M. Feller, M. Gagelmann and W. G. Forssmann* 93

Current Techniques
Lateral mobility measurement of cell surface components: applications for molecular pharmacology, *Yoav I. Henis* 95

Letters
The beginnings of hirudin, *Klaus Starke* 99
Adenosinergic psychopharmaceuticals? *J. Deckert and C. H. Gleiter* 99

Special Feature
Archives of the Catecholamine Club, twenty years on, *Walter R. Dixon and Cyrus R. Creveling* 100

Reviews
The signal transduction system of the leukotriene D_4 receptor, *Stanley T. Crooke, Mike Mattern, Henry M. Sarau, James D. Winkler, Joanna Balcarek, Angela Wong and C. Frank Bennett* 103
Polymorphism of cytochrome P-450 in humans, *F. Peter Guengerich* 107
Control of transmitter release from the motor nerve by presynaptic nicotinic and muscarinic autoreceptors, *Ignaz Wessler* 110
Receptors that inhibit phosphoinositide breakdown, *Joel Linden and Thérèse Mary Delahunty* 114

Books
Endothelial Cell Biology in Health and Disease, *edited by Nicolae Simionescu and Maya Simionescu* 120
Radiochemicals in Biomedical Research, *edited by E. A. Evans and K. G. Oldham* 121
Steroid Receptors and Disease: Cancer, Autoimmune, Bone and Circulatory Disorders, *edited by P. J. Sheridan, K. Blum and M. C. Trachtenberg* 122
Alpha$_2$-adrenergic Receptors, *edited by Lee E. Limbird* 123

APRIL

Growth factors, oncogenes and anti-oncogenes in cancer, *Robert B. Dickson* 125

Current Awareness
Interactions between dopamine and 5-HT_3 receptors suggest new treatments for psychosis and drug addiction, *Mark D. Tricklebank* 127
Not just a matter of taste, *Ivan Izquierdo* 129
Species differences in the pharmacology of terminal 5-HT autoreceptors in mammalian brain, *Daniel Hoyer and Derek N. Middlemiss* 130

This and That: the ethics of experimentation and the legitimate fear of flying, *B. Max* 133

Letters
Regulation of AChE by a dipeptide, *Laurie Haynes* 136
Presynaptic nicotinic autoreceptors, *W. C. Bowman* 136
Multiple bradykinin B_2 receptors, *D. Regoli* 138
Robin Plevin replies 138

Reviews
Molecular recognition of inositol polyphosphates by intracellular receptors and metabolic enzymes, *Stefan R. Nahorski and Barry V. L. Potter* 139
Effects of nerve growth factor on cholinergic brain neurons, *Cheryl F. Dreyfus* 145
Regulation of sexual differentiation in drug and steroid metabolism, *Peter G. Zaphiropoulos, Agneta Mode, Gunnar Norstedt and Jan-Åke Gustafsson* 149
Pharmacology of the colony-stimulating factors, *George Morstyn, Graham J. Lieschke, William Sheridan, Judith Layton and Jonathan Cebon* 154
The histamine H_3 receptor: a general presynaptic histaminergic regulatory system? *Jan F. van der Werf and Hendrik Timmerman* 159

Books
Drug–Nutrient Interactions, *by T. K. Basu* 162
Biochemical and Pharmacological Aspects of Depression, *edited by Keith F. Tipton and Moussa B. H. Youdim* 163
Relaxing and Contracting Factors, *edited by Paul M. Vanhoutte* 163
Distance Geometry and Molecular Conformation, *by G. M. Crippen and T. F. Havel* 164
Receptor Pharmacology and Function, *edited by Michael Williams, Richard A. Glennon and Pieter B. M. W. M. Timmermans* 164
Calcium Antagonists, *by Winifred G. Nayler* 165

MAY

Unwarranted pessimism in cancer chemotherapy, *John Hickman* 167
Obituary: Jean Cheymol (1896–1988), *Paul Lechat* 169
State- and use-independent Ca^{2+} antagonists offer hope in control of GI disorders, *F. V. DeFeudis and M-O. Christen* 170

Current Awareness
Electrophysiology of 5-HT_3 receptors in neuronal cell lines, *John A. Peters and Jeremy J. Lambert* 172
Mechanism of action of scopolamine as an amnestic, *Ivan Izquierdo* 175

Current Techniques
Analysis of mercapturic acids as a tool in biotransformation, biomonitoring and toxicological studies, *N. P. E. Vermeulen* 177

Computers
Iterative least squares fitting of pH-partition data, *Robin Whelpton* 182

Principles
Can equal pA_2 values be compatible with receptor differences? *Robert B. Raffa, Jeffry L. Vaught and Frank Porreca* 183

Viewpoint
Adenosine release may mediate spinal analgesia by morphine, *Jana Sawynok, Marva I. Sweeney and Thomas D. White* 186

Reviews
Corticotropin-releasing factor: endocrine and autonomic integration of responses to stress, *Laurel A. Fisher* 189
Pharmacology in space: PART I Influence of adaptive changes on pharmacokinetics, *Claire M. Lathers, John B. Charles and Michael W. Bungo* 193
5-HT_1-like receptor agonists and the pathophysiology of migraine, *Pramod R. Saxena and Michel D. Ferrari* 200

Books
Drugs, Athletes, and Physical Performance, *edited by John A. Thomas* 204
Microcomputers in Physiology: A Practical Approach, *edited by P. J. Fraser* 205
New editions 206

Trade TiPS 206

JUNE

Molecular pharmacology and drug action: structural information casts light on ligand binding, *Peter R. Schofield and Alison Abbott* 207

Current Awareness

Similarities in mode and sites of action of sarafotoxins and endothelins, *Yoel Kloog and Mordechai Sokolovsky* 212

The Ca^{2+} channel and 5-HT_2 receptor antagonist (s)-emopamil in cerebral ischaemia, *F. V. DeFeudis* 215

Staurosporine, K-252 and UCN-01: potent but nonspecific inhibitors of protein kinases, *Urs T. Rüegg and Gillian M. Burgess* 218

This and That: sound and silence, *B. Max* 220

Special Feature

The teaching of clinical pharmacology in Europe and North America, *Michael Orme and Marcus M. Reidenberg* 224

Principles

Calculating receptor number from binding experiments using same compound as radioligand and competitor, *Antonio DeBlasi, Kevin O'Reilly and Harvey J. Motulsky* 227

Reviews

Bivalent ligands and the message–address concept in the design of selective opioid receptor antagonists, *Philip S. Portoghese* 230

Protein kinase C and long-term potentiation in the hippocampus, *Roger Anwyl* 236

Interleukin 2: prototype for a new generation of immunoactive pharmaceuticals, *Thomas Ciardelli and Kendall A. Smith* 239

Pharmacology in space: PART 2 Controlling motion sickness, *Claire M. Lathers, John B. Charles and Michael W. Bungo* 243

Books

Inositol Lipids in Cell Signalling, *edited by Robert H. Michell, Alan H. Drummond and C. Peter Downes* 251

Principles in General Pharmacology, *by R. J. Tallarida, R. B. Raffa and P. McGonigle* 252

Insulin Receptors (Receptor Biochemistry and Methodology, Vols 12A and 12B), *edited by C. Ronald Kahn and Len C. Harrison* 252

New editions 253

JULY

PAF: new antagonists, new roles in disease and a major role in reproductive biology, *Clive Page and Alison Abbott* 255

Welcome to IUTOX, *Perry J. Gehring* 257

Current Awareness

The long and the short of snake toxins, *Mark J. Dufton and Alan L. Harvey* 258

Obituary: Leon I. Goldberg (1926–1989), *Sol. I. Rajfer* 259

Adenosine deaminase for removing adenosine: how much is enough? *Joel Linden* 260

Brain microdialysis fails to detect a dopamine–acetylcholine interaction in the basal ganglia, *B. H. C. Westerink and G. Damsma* 262

Letter

H_3 receptors in airways, *Peter J. Barnes and Masakazu Ichinose* 264

Special Feature

Hans Horst Meyer and the lipoid theory of narcosis, *Robert L. Lipnick* 265

Reviews

Non-peptide ligands for peptide receptors, *Roger M. Freidinger* 270

Mechanisms of cell death, *Alan R. Boobis, Duncan J. Fawthrop and Donald S. Davies* 275

Role of Ca^{2+} in toxic cell killing, *Sten Orrenius, David J. McConkey, Giorgio Bellomo and Pierluigi Nicotera* 281

The control of cytochrome P-450 gene expression by dioxin, *James P. Whitlock, Jr* 285

Toxic effects of environmental chemicals on the immune system, *Jef Vos, Henk Van Loveren, Piet Wester and Dick Vethaak* 289

Books

Disturbance Index Method for Assessing Severity of Procedures on Rodents, *by R. J. Barclay, W. J. Herbert and T. B. Poole* 293

Glutathione Conjugation: Mechanisms and Biological Significance, *edited by Helmut Sies and Brian Ketterer* 293
Multinational Drug Companies: Issues in Drug Discovery and Development, *by Bert Spilker* 294
New editions 295

AUGUST

Increasing complexity revealed in regulation of Ca^{2+} antagonist receptor, *T. Godfraind and S. Govoni* 297
Validity of animal models in endocrine pathology, *John D. Flack and Peter Swann* 301

Current Awareness
Point mutations may account for pyrimethamine resistance, *Caroline Ash* 303
HIV proteinase as a target for drug action, *Margaret I. Johnston, H. S. Allaudeen and Nava Sarver* 305
5-HT_{1C} receptor activation: a key step in the initiation of migraine? *J. R. Fozard and J. A. Gray* 307

Current Techniques
Identification of human serum cholinesterase variants using the polymerase chain reaction amplification technique, *Bert N. La Du* 309

This and That: exotic foods – prophylaxis and peril, *B. Max* 313

Letters
Adenosine and morphine, *T. W. Stone, B. B. Fredholm and J. W. Phillis* 316

Viewpoint
Is there a third heart β-adrenoceptor? *Alberto J. Kaumann* 316

Reviews
Ca^{2+} localization and sensitivity in vascular smooth muscle, *Hideaki Karaki* 320
Distribution and anchoring of molecular forms of acetylcholinesterase, *Nibaldo C. Inestrosa and Alejandra Perelman* 325
α-Adrenoceptors in human and animal cerebral arteries: alterations after sympathetic denervation and subarachnoid hemorrhage, *Motohatsu Fujiwara, Tetsuya Tsukahara and Takashi Taniguchi* 329
Antiviral drug resistance, *Hugh J. Field and Siân E. Goldthorpe* 333

Books
Prostaglandins, Leukotrienes, and the Immune Response, *by John L. Ninnemann* 337
Pharmacology of the Skin I, *edited by M. W. Greaves and S. Shuster* 338

SEPTEMBER

Therapeutic potential for new selective adenosine receptor ligands and metabolism inhibitors, *Christopher J. Bowmer and Michael S. Yates* 339

Current Awareness
Are there multiple imidazoline binding sites? *Martin C. Michel and Paul A. Insel* 342
Behavioral drug actions and brain lateralization, *Ivan Izquierdo* 344

Current Techniques
PCR and the cloning of receptor subtype genes, *Steve P. Watson and William James* 346

Comment
Signs of the times: the need for a stereochemically informative generic name system, *Miklòs Simonyi, Joseph Gal and Bernard Testa* 349

Reviews
Cytochrome P-450 catalysis: radical intermediates and dehydrogenation reactions, *Paul R. Ortiz de Montellano* 354
Hormone and growth factor receptor-mediated regulation of phospholipase C activity, *José L. Boyer, John R. Hepler and T. Kendall Harden* 360
Involvement of pyrimidinoceptors in the regulation of cell functions by uridine and by uracil nucleotides, *Roland Seifert and Günter Schultz* 365
Pharmacological modulators of DNA-interactive antitumor drugs, *John S. Lazo and Robert R. Bahnson* 369
Molecular biology and biochemistry of the endothelins, *Masashi Yanagisawa and Tomoh Masaki* 374

Books
Ayurveda Revisited, *by Sharadini Dahanukar and Urmila Thatte* 379
Platelets: Receptors, Adhesion, Secretion (Part A: Methods in Enzymology, Vol. 169), *edited by Jacek Hawiger* 380
The Serotonin Receptors, *edited by Elaine Sanders-Bush* 381
Implications of the Blood–Brain Barrier and its Manipulation, Vol. 1: Basic Science Aspects, *edited by Edward A. Neuwelt*
Implications of the Blood–Brain Barrier and its Manipulation, Vol. 2: Clinical Aspects, *edited by Edward A. Neuwelt* 381

OCTOBER

Disease states can modify both receptor number and signal transduction pathways, *Otto-Erich Brodde and Martin C. Michel* 383

Current Awareness
The 5-HT_4 receptor: naughty, but nice, *David E. Clarke, Douglas A. Craig and John R. Fozard* 385
Receptors and the common cold, *S. J. Enna and Larry R. Steranka* 387
New advances in molecular pharmacology of Ca^{2+} channels, *David Rampe and David J. Triggle* 388

This and That: chocolate addiction, the dual pharmacogenetics of asparagus eaters, and the arithmetic of freedom, *B. Max* 390

Letters
Reading the SIGNS in drug names, *John Caldwell* 394
Improper use of proper SIGNS, *E. J. Ariëns* 394
Tools are inadequate to investigate ACh–DA controversy, *R. A. Webster* 395
Nicotinic involvement in ACh–DA interaction? *S. Wonnacott* 395
Westerink and Damsma reply 396
Pharmacological manipulation of diacylglycerol-dependent protein kinase C, *Sunil Joseph and Sushila Krishnamurthi* 396

Viewpoint
New anti-ischaemic drugs: cytoprotective action with no primary haemodynamic effects, *Erik Boddeke, Jacqueline Hugtenburg, Walter Jap, Jaap Heynis and Pieter van Zwieten* 397

Reviews
$GABA_B$ receptors and their significance in mammalian pharmacology, *Norman Bowery* 401
Multiplicity of $GABA_A$–benzodiazepine receptors, *Werner Sieghart* 407
Transmembrane signalling at the epidermal growth factor receptor, *Atanasio Pandiella, Laura Beguinot, Lucia M. Vicentini and Jacopo Meldolesi* 411
Botulinum ADP-ribosyltransferase C_3: a new tool to study low molecular weight GTP-binding proteins, *Klaus Aktories and Alan Hall* 415
Interaction of CCK with pancreatic acinar cells, *Robert T. Jenson, Stephen A. Wank, Wesley H. Rowley, Shunsuke Sato and Jerry D. Gardner* 418

Books
Peptide Hormones as Prohormones: Processing, Biological Activity, Pharmacology, *edited by Jean Martinez* 424
Design of Enzyme Inhibitors as Drugs, *edited by Merton Sandler and H. John Smith* 424
Protecting Biotechnology Inventions: A Guide for Scientists, *by Roman Saliwanchik* 425

Trade TiPS 426

NOVEMBER

Second messenger role for NO widens to nervous and immune systems, *Joe Collier and Patrick Vallance* 427

Current Awareness
Moving together: K^+ channel openers and ATP-sensitive K^+channels, *Ulrich Quast and Nigel S. Cook* 431
Designing antisense oligonucleotides as pharmaceutical agents, *Jack S. Cohen* 435
Dystrophin and the membrane hypothesis of muscular dystrophy, *Kiichi Arahata and Hideo Sugita* 437

Principles
Hill coefficients and the logistic equation, *Richard Barlow and Joanna F. Blake* 440

Obituary: Diane Haddock Russell 441

Reviews
Forskolin: a specific stimulator of adenylyl cyclase or a diterpene with multiple sites of action? *Antonio Laurenza, Elizabeth McHugh Sutkowski and Kenneth B. Seamon* 442
Molecular sites of anesthetic action in postsynaptic nicotinic membranes, *Stuart A. Forman and Keith W. Miller* 447
Aspirin and human platelets: from clinical trials to acetylation of cyclooxygenase and back, *Carlo Patrono* 453
Intracellular pathways and mechanisms of sorting in receptor-mediated endocytosis, *Virginia L. Shepherd* 458
Mechanism of hypersensitivity reactions: proposed involvement of reactive metabolites generated by activated leukocytes, *Jack Uetrecht* 463

Books
The Health Conspiracy, *by Joe Collier* 468

DECEMBER

Novel antihypertensive drug reveals unexpected complexities in β-adrenoceptor pharmacology, *Harry Struyker Boudier and Alison Abbott* 469
Molecular biological techniques make an impact on medicinal chemistry, *F. J. Zeelen* 472

Current Awareness
A game with shifting mirrors, *Ivan Izquierdo* 473
The $GABA_A$ receptor: molecular biology reveals a complex picture, *Peter R. Schofield* 476
Neurotrophic, neurotoxic and mitogenic activities of amyloid proteins, *F. V. DeFeudis* 479

Computers
MOM: A computer program for the automatic calculation of statistical moments in pharmacokinetic studies, *C. Efthymiopoulos, E. Piemont and L. Jung* 480

This and That: the war on drugs and the evolution of sulfur, *B. Max* 483

Letters
Identification system for stereoisomeric drugs, *H. van der Goot and H. Timmerman* 486
More education better than new prefixes, *John L. Neumeyer* 487

Viewpoint
The relevance of pharmacological dose–response curves to airway narrowing, *Howard W. Mitchell and Malcolm P. Sparrow* 488

Reviews
Inhibitors of steroid 5α-reductase in benign prostatic hyperplasia, male pattern baldness and acne, *Brian W. Metcalf, Mark A. Levy and Dennis A. Holt* 491
Substituted 2-oxiranecarboxylic acids: a new group of candidate hypoglycaemic drugs, *Peter L. Selby and H. Stanley A. Sherratt* 495
Dextromethorphan and neuromodulation: old drug coughs up new activities, *Frank C. Tortella, Mario Pellicano and Norman G. Bowery* 501
1,4-Dihydropyridine activators and antagonists: structural and functional distinctions, *David J. Triggle and David Rampe* 507

Books
Asthma: Basic Mechanisms and Therapeutic Perspectives, *edited by J. R. Vane, G. A. Higgs, S. A. Marsico and G. Nisticò* 511
The Peripheral Actions of 5-Hydroxytryptamine, *edited by John R. Fozard* 512
Quinolinic Acid and the Kynurenines, *edited by Trevor W. Stone* 513

ERRATA

Energetics of conformational changes in receptors, *by Frederick J. Ehlert* (November 1988, pp. 393–394) 102
Distance Geometry and Molecular Conformation, *by G. M. Crippen and T. F. Havel* (Book Review, April, p. 164) 253
Identification of human serum cholinesterase variants using the polymerase chain reaction amplification technique, *by Bert La Du* (August, pp. 309–313) 345
Are there multiple imidazoline binding sites? *by Martin C. Michel and Paul A. Insel* (September, pp. 342–344) 467
